

Enamel Coated Enameled Copper Winding Wire 0.10mm-3.35mm Wire Diameter for Long-Lasting Copper Winding

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: PEWF/U2
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

Product Specification

- Wire Diameter: 0.10mm-3.35mm
- Insulation Material: Enamel
- Origin Country: China
- Material: Copper
- Warranty: 3 Years
- Insulation Class: Class155
- Voltage Rating: Up To 2800V
- Enamel Thickness: Class Three
- Highlight: Long-Lasting Enameled Copper Winding Wire, 3.35mm Enameled Copper Winding Wire, 0.10mm Enameled Copper Winding Wire

Product Description

Product Description:

Are you looking for high-quality enamelled copper winding wire for your electrical applications? Look no further than our Enameled Copper Winding Wire product, designed to meet your specific needs and requirements.

This enamelled copper winding wire is a reliable and efficient solution for various electrical applications due to its durability and high performance. With a warranty of 3 years, you can trust the quality and longevity of this product for your projects.

The insulation material used in this enamelled copper winding wire is enamel, providing excellent protection and insulation for the copper wire. The enamel thickness is Class Three, ensuring optimal performance and durability in demanding environments.

Our Enameled Copper Winding Wire is made of high-quality copper, a material known for its excellent conductivity and reliability in electrical applications. The use of copper ensures that the wire delivers consistent and efficient performance in various settings.

With an insulation class of Class155, this enamelled copper winding wire is suitable for a wide range of temperature and environmental conditions. Whether you need a reliable solution for high-temperature applications or demanding environments, this product is designed to meet your needs.

Whether you are working on electrical motors, transformers, or other applications that require a reliable and efficient winding wire, our Enameled Copper Winding Wire is the ideal choice. Its high-quality construction and materials make it a versatile solution for various projects.

Experience the benefits of using our enamelled copper winding wire, such as improved efficiency, reliability, and performance in your electrical applications. This product is designed to meet industry standards and specifications, ensuring that you get the best results for your projects.

Upgrade your electrical projects with our Enameled Copper Winding Wire, a durable and reliable solution that offers exceptional performance and longevity. Whether you are a professional electrician, engineer, or hobbyist, this product is suitable for a wide range of applications.

Trust in the quality and performance of our Enameled Copper Winding Wire for your electrical projects. With its high-quality construction, reliable materials, and excellent insulation properties, this product is a top choice for demanding applications.

Invest in the durability and efficiency of our Enameled Copper Winding Wire for your electrical needs. Whether you are building, repairing, or upgrading electrical systems, this product is designed to provide the performance and reliability you require.

Upgrade your electrical projects with our Enameled Copper Winding Wire and experience the benefits of using high-quality enamelled copper magnet wire. Whether you are working on transformers, motors, or other electrical applications, this product is a reliable and efficient solution.

Get the performance and reliability you need for your electrical projects with our Enameled Copper Winding Wire. With its high-quality materials, durable construction, and excellent insulation properties, this product is designed to meet your specific requirements.

Experience the versatility and efficiency of our Enameled Copper Winding Wire, a top-quality solution for various electrical applications.

Whether you are a professional or DIY enthusiast, this product is an ideal choice for your projects.

Upgrade your electrical systems with our Enameled Copper Winding Wire, a reliable and efficient solution for your projects. With its high-quality construction, durable materials, and excellent insulation properties, this product is designed to deliver exceptional performance.

Features:

Product Name: Enameled Copper-Winding Wire

Insulation Material: Enamel

Voltage Rating: Up To 2800V

Origin Country: China

Warranty: 3 Years

Enamel Thickness: Class Three

Technical Parameters:

Insulation Class	Class155
Voltage Rating	Up To 2800V
Origin Country	China
Enamel Thickness	Class Three
Insulation Material	Enamel
Wire Diameter	0.10mm-3.35mm
Material	Copper
Warranty	3 Years

Applications:

PEWSC Enameled Copper Winding Wire (Model: PEWF/U2) is a high-quality product originating from China, certified by UL. This insulated magnetic copper wire is versatile and can be used in a variety of applications across different industries.

Here are some product application occasions and scenarios where PEWSC Enameled Copper Winding Wire can be effectively utilized:

- Electric Motors:** The insulated copper winding wire is ideal for use in electric motors, ensuring efficient performance and durability. Its voltage rating of up to 2800V makes it suitable for various motor applications.
- Transformers:** PEWSC Enameled Copper Winding Wire is commonly used in the winding of transformers due to its high insulation

quality and reliable performance. The wire diameter ranging from 0.10mm to 3.35mm provides flexibility in transformer design.

3. **Coil Manufacturing:** Whether it's for electronic components or industrial equipment, this polyurethane copper coil is perfect for coil manufacturing processes. Its enamel insulation material guarantees safety and longevity.

4. **Electrical Appliances:** From household appliances to industrial machinery, PEWSC Enameled Copper Winding Wire is a preferred choice for various electrical applications. Its UL certification ensures compliance with industry standards.

5. **Automotive Industry:** The enameled copper wire is also used in the automotive sector for applications such as ignition systems, lighting, and sensors. Its high quality and durability make it a reliable component in vehicles.

With a minimum order quantity of 300KG and flexible pricing based on the order, customers can easily procure PEWSC Enameled Copper Winding Wire for their specific needs. The packaging details in cartons ensure safe transportation and storage, while the quick delivery time of 3-5 work days enables timely project completion.

Customers can enjoy the convenience of cash-on-payment terms, making transactions hassle-free. Additionally, the supply ability of delivering 10-15 days after the next order ensures a steady availability of the product.

PEWSC Enameled Copper Winding Wire comes with a generous 3-year warranty, reflecting the brand's commitment to quality and customer satisfaction. Its versatility, high voltage rating, and insulation material make it a reliable choice for various industries and applications.

Customization:

Product Customization Services for the Enameled Copper Winding Wire:

Brand Name: PEWSC

Model Number: PEWF/U2

Place of Origin: China

Certification: UL

Minimum Order Quantity: 300KG

Price: It depends on order

Packaging Details: Carton

Delivery Time: 3-5 Work days

Payment Terms: Cash on payments

Supply Ability: Delivery 10-15 Days after Next Order

Warranty: 3 Years

Origin Country: China

Material: Copper

Enamel Thickness: Class Three

Insulation Class: Class155

Keywords: Insulated Copper Winding Wire, Insulated Magnetic Copper Wire, Enameled Magnet Wire
