

Class155 Insulated Copper Winding Wire for Electrical Equipment Up To 2800V Voltage Rating

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: UEFN/U1
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

Product Specification

- Insulation Class: Class155
- Wire Diameter: 0.10mm-3.35mm
- Origin Country: China
- Warranty: 3 Years
- Material: Copper
- Enamel Thickness: Class One
- Voltage Rating: Up To 2800V
- Insulation Material: Enamel

Product Description

Product Description:

Enameled Copper Winding Wire is a high-quality product that is widely used in various electrical applications. It is also known as Insulated Copper Winding Wire or Enameled Magnet Wire. This specific product features a Class One enamel thickness, ensuring durability and reliability in its performance.

Originating from China, this Enameled Copper Winding Wire is crafted with precision and expertise to meet the highest standards of quality. The insulation material used in this wire is enamel, providing excellent protection and insulation for the copper conductors within. With an insulation class of Class155, this Enameled Copper Winding Wire is designed to withstand high temperatures and harsh operating conditions. The superior insulation properties ensure the safety and longevity of the wire, making it a dependable choice for various electrical projects.

Customers can have peace of mind when purchasing this product as it comes with a generous 3-year warranty. This warranty reflects the manufacturer's confidence in the durability and performance of the Enameled Copper Winding Wire, assuring customers of its quality and reliability.

Whether you are working on a small DIY project or a large industrial application, this Enameled Copper Winding Wire is a versatile and essential component. Its excellent conductivity, thermal stability, and insulation make it ideal for use in motors, transformers, coils, and other electrical devices.

Investing in high-quality materials like Enameled Copper Winding Wire is crucial for ensuring the efficiency and safety of electrical systems. The enamel insulation and copper conductors work together harmoniously to deliver optimal performance and durability, even in demanding environments.

Upgrade your electrical projects with the superior quality and reliability of Enameled Copper Winding Wire. Trust in its Class One enamel thickness, Class155 insulation class, and 3-year warranty to provide you with the confidence and assurance you need for your applications.

Features:

Product Name: Enameled Copper Winding Wire

Insulation Class: Class155

Wire Diameter: 0.10mm-3.35mm

Enamel Thickness: Class One

Voltage Rating: Up To 2800V

Origin Country: China

Technical Parameters:

Material	Copper
Warranty	3 Years
Insulation Material	Enamel
Origin Country	China
Enamel Thickness	Class One
Wire Diameter	0.10mm-3.35mm
Voltage Rating	Up To 2800V
Insulation Class	Class155

Applications:

Enameled Copper Winding Wire by PEWSC, model number UEFN/U1, is a high-quality product originating from China. This product is certified by UL, ensuring its reliability and safety for various applications.

The Product Application Occasions and Scenarios for the Enameled Copper Winding Wire are versatile due to its unique attributes. With a minimum order quantity of 300KG, customers can order based on their specific needs. The price of the wire depends on the order quantity, making it flexible for different budgets.

PEWSC Enameled Copper Winding Wire is suitable for a wide range of applications such as in the manufacturing of Enameled Copper Conductors, Polyurethane Copper Coil, and other electrical components. The wire's insulation class of Class155 and enamel thickness of Class One make it ideal for use in various voltage ratings up to 2800V.

When it comes to packaging, the wire is carefully packed in cartons for safe transportation. Customers can expect a quick delivery time of 3-5 work days, ensuring timely fulfillment of orders. Payment terms are convenient with cash on payments accepted.

PEWSC Enameled Copper Winding Wire offers a supply ability that guarantees delivery within 10-15 days after the next order. This makes it a reliable choice for businesses with consistent manufacturing needs.

Overall, this product is a top choice for industries requiring high-quality copper winding wire with excellent performance characteristics. Its versatility, reliability, and compliance with industry standards make it a valuable asset for various applications in the electrical and manufacturing sectors.

Packing and Shipping:

Product Packaging and Shipping for Enameled Copper Winding Wire:

- The enameled copper winding wire is carefully packaged in spools or coils to ensure safe transport and storage.
- Each spool or coil is then placed in a sturdy box or carton for added protection during shipping.
- The boxes are labeled with product information, including wire gauge, length, and any special instructions.
- The packages are then sealed and prepared for shipping to the designated destination.
