

## HEVW -200C Enamelled Copper Winding Wire Production with Solid Conductor Type and Oxygen Free Copper Conductor

Our Product Introduction

for more products please visit us on [enamel-wire.com](http://enamel-wire.com)

### Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: HEVW -200C
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

### Product Specification

- Conductor Material: Copper
- Size: Customizable
- Conductor: Oxygen Free Copper
- Color: Various Colors Available
- Conductor Type: Solid
- Color Option: Natural Red
- Product Type: HEVW -200C
- Temperature Resistance: 200°C
- Highlight: HEVW -200C Copper Winding Wire, Enamelled Copper Winding Wire Production

## Product Description

### Product Description:

The Enameled Flat Copper Wire, also known as Enamelled Copper Rectangular Wire, is a versatile and high-quality product suitable for various applications. Available in two color options - Natural and Red, this wire offers customization in size to meet specific project requirements. The flat coated wire is designed to withstand temperatures up to 200°C, making it a reliable choice for heat-intensive environments.

Whether you need the wire for industrial, electrical, or other applications, its temperature resistance ensures durability and performance under challenging conditions. The Enameled Copper Rectangular Wire comes in various colors, providing flexibility and options for different projects and designs.

When it comes to packaging, customers have the flexibility to choose between spools, coils, or customized packaging options. This ensures convenience and ease of use, allowing for efficient handling and storage of the wire.

With its high-quality construction and customizable features, the Enameled Flat Copper Wire is a reliable and practical choice for a wide range of applications. Whether you are working on electronics, machinery, or other projects, this wire provides the durability and performance needed to meet your requirements.

### Features:

Product Name: Enameled Flat Copper Wire

Color: Various Colors Available

Product Type: HEVW -200C

Size: Customizable

Color Option: Natural, Red

Conductor: Oxygen Free Copper

### Technical Parameters:

Color Option	Natural, Red
Product Type	HEVW -200C
Packing	Spool, Coil, Or Customized
Temperature Resistance	200°C
Size	Customizable
Conductor	Oxygen Free Copper
Conductor Material	Copper
Color	Various Colors Available
Shape	Flat
Conductor Type	Solid

### Applications:

Product Application Occasions and Scenarios for PEWSC's Corona-resistance Enamelled Copper Wires:

PEWSC's Corona-resistance Enamelled Copper Wires, also known as Enameled Flat Copper Wire, are versatile products suitable for various applications due to their exceptional attributes. Here are some common scenarios where this product excels:

**Electric Motors:** The high-quality enamelled copper wires from PEWSC are ideal for use in electric motors, ensuring reliable performance and efficiency. The Corona-resistance feature makes these wires particularly suitable for motor winding applications where high voltage and corona discharge are concerns.

**Transformers:** The excellent insulation properties of PEWSC's enamelled copper wires make them perfect for use in transformers. Whether it's power transformers, distribution transformers, or instrument transformers, these wires provide the necessary electrical conductivity and insulation for optimal transformer performance.

**Coil Winding:** Enamelled Copper Rectangular Wire from PEWSC is commonly used in coil winding applications due to its flexibility and durability. Whether it's for electromagnetic coils, inductors, or chokes, these wires ensure precise winding and reliable operation.

**Electrical Equipment:** From solenoids to relays, from generators to sensors, PEWSC's enamelled copper wires find extensive use in various electrical equipment. The customizable size options and availability in different colors such as Natural and Red make these wires versatile for different equipment requirements.

**Automotive Industry:** Enamelled Copper Winding Wire from PEWSC is also widely used in the automotive industry for applications such as wiring harnesses, ignition systems, and electric vehicle components. The high-quality conductor material (Oxygen Free Copper) ensures optimal performance and durability in demanding automotive environments.

PEWSC's Corona-resistance Enamelled Copper Wires are UL certified, guaranteeing their quality and reliability. With a minimum order quantity of 300KG and customizable size options, these wires offer flexibility to meet specific project requirements. The packaging details in cartons, along with quick delivery times and cash payment terms, make sourcing these wires convenient for businesses. With a supply ability to deliver 10-15 days after the next order, PEWSC ensures a steady and reliable supply of these essential wires for various applications.

## Customization:

Product Customization Services for Enameled Flat Copper Wire:

Brand Name: PEWSC

Model Number: Corona-resistance Enamelled Copper Wires

Place of Origin: China

Certification: UL

Minimum Order Quantity: 300KG

Price: It depends on order

Packaging Details: Carton

Delivery Time: 3-5 Work days

Payment Terms: Cash on payments

Supply Ability: Delivery 10-15 Days after Next Order

Color Option: Natural, Red

Conductor: Oxygen Free Copper

Product Type: HEVW -200C

Size: Customizable

Conductor Type: Solid

## Packing and Shipping:

Product Packaging:

The Enameled Flat Copper Wire is carefully packaged to ensure its safe delivery. Each spool is wrapped in protective material to prevent any damage during transportation.

Shipping:

We offer fast and secure shipping for the Enameled Flat Copper Wire. Your order will be processed promptly and shipped using a trusted courier service to ensure timely delivery to your specified address.

## FAQ:

Q: What is the brand name of the enameled flat copper wire?

A: The brand name is PEWSC.

Q: What is the model number of the enameled flat copper wire?

A: The model number is Corona-resistance Enamelled copper wires.

Q: Where is the enameled flat copper wire manufactured?

A: The wire is manufactured in China.

Q: What is the certification of the enameled flat copper wire?

A: The wire is certified by UL.

Q: What is the minimum order quantity for the enameled flat copper wire?

A: The minimum order quantity is 300KG.
