

## Natural Color Enamelled Copper Rectangular Wire with Solid Conductor Option

Our Product Introduction

for more products please visit us on [enamel-wire.com](http://enamel-wire.com)

### Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: Corona-resistance Enamelled copper wires
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

### Product Specification

- Packing: Spool, Coil, Or Customized
- Color: Various Colors Available
- Conductor Material: Copper
- Temperature Resistance: 200°C
- Size: Customizable
- Conductor Type: Solid
- Shape: Flat
- Conductor: Oxygen Free Copper
- Highlight: **Solid Conductor Rectangular Copper Wire,  
Natural Color Rectangular Copper Wire,  
Solid Conductor Enamelled Rectangular Copper Wire**

## Product Description

### Product Description:

Are you looking for a reliable and high-quality enamelled copper winding wire for your electrical applications? Look no further than our Enameled Flat Copper Wire product, designed to meet your specific needs and requirements. With a product type of HEVW -200C, this wire is suitable for a wide range of applications where durability and efficiency are key.

Our Enameled Flat Copper Wire features a solid conductor type, ensuring a stable and consistent electrical connection. The solid conductor design provides excellent conductivity and strength, making it ideal for demanding applications where reliability is crucial.

Whether you are working on a small electronics project or a large industrial application, this wire is up to the task.

Available in two color options, Natural and Red, our Enameled Flat Copper Wire offers versatility and customization to suit your preferences and project requirements. The natural color option provides a sleek and professional look, while the red option adds a pop of color for easy identification and organization. Choose the color that best suits your needs and enjoy the added convenience it brings.

Made from high-quality copper, our Enameled Flat Copper Wire ensures superior performance and longevity. Copper is known for its excellent conductivity, corrosion resistance, and durability, making it the perfect choice for electrical wiring applications. With our flat coated wire design, you can trust that your connections will remain secure and reliable over time.

The flat shape of our Enameled Copper Winding Wire offers unique advantages for various applications. The flat design allows for easy installation in tight spaces and ensures a secure and stable connection, reducing the risk of tangling or damage. Whether you are working on a complex wiring project or a simple repair job, our flat coated wire provides the flexibility and performance you need.

When it comes to choosing the right wire for your electrical projects, our Enameled Flat Copper Wire stands out for its quality, reliability, and performance. With a solid conductor type, two color options, copper material, and flat shape, this wire is designed to meet the needs of professionals and DIY enthusiasts alike. Trust in our product to deliver consistent results and superior performance for all your wiring needs.

### Features:

Product Name: Enameled Flat Copper Wire

Conductor Type: Solid

Shape: Flat

Temperature Resistance: 200°C

Packing: Spool, Coil, Or Customized

Product Type: HEVW -200C

### Technical Parameters:

Product Type	HEVW -200C
Conductor Type	Solid
Temperature Resistance	200°C
Conductor Material	Copper
Shape	Flat
Conductor	Oxygen Free Copper
Size	Customizable
Packing	Spool, Coil, Or Customized
Color Option	Natural,Red
Color	Various Colors Available

### Applications:

PEWSC's Corona-resistance Enamelled Copper Wires are a versatile product suitable for a wide range of applications due to their high quality and durability. Here are some product application occasions and scenarios for the Enamelled Flat Copper Wire:

**1. Electric Motors:** The Enamelled Copper Rectangular Wire is ideal for use in electric motors due to its excellent conductivity and insulation properties. It ensures efficient performance and long-lasting durability.

**2. Transformers:** The Enamelled Copper Rectangular Wire is commonly used in transformers for its ability to carry high currents without overheating. Its corona-resistance feature makes it a reliable choice for transformer applications.

**3. Generators:** The Enamelled Copper Rectangular Wire is well-suited for use in generators where high electrical conductivity and thermal stability are essential. It helps in maintaining the efficiency and reliability of the generator.

**4. Automotive Industry:** The Enamelled Copper Rectangular Wire finds applications in the automotive industry for wiring harnesses and other electrical components. Its customizable size and various color options make it adaptable to different automotive systems.

**5. Household Appliances:** The Enamelled Copper Rectangular Wire is commonly used in household appliances such as refrigerators, air conditioners, and washing machines. Its UL certification ensures safety and compliance with industry standards. With its origin in China, the PEWSC Enamelled Copper Wires offer a reliable solution for various industries. The product is certified by UL, guaranteeing its quality and safety standards. The minimum order quantity is 300KG, and the price depends on the order quantity. Packaged in cartons, the Enamelled Copper Rectangular Wires are delivered within 3-5 work days, with payment terms available as cash on payments. The supply ability allows for delivery within 10-15 days after the next order. The Conductor Material is high-quality copper, ensuring excellent conductivity. The product type is HEVW-200C, and it is available in various colors to suit different application needs. Whether packed in spools, coils, or customized packaging, the Enamelled Copper Rectangular Wire offers versatility and reliability for a wide range of electrical applications.

### Customization:

Product Customization Services for Flat Coated Wire:

Brand Name: PEWSC  
Model Number: Corona-resistance Enamelled copper wires  
Place of Origin: China  
Certification: UL  
Minimum Order Quantity: 300KG  
Price: It depends on order  
Packaging Details: Carton  
Delivery Time: 3-5 Work days  
Payment Terms: Cash on payments  
Supply Ability: Delivery 10-15 Days after Next Order  
Packing: Spool, Coil, Or Customized  
Color: Various Colors Available  
Shape: Flat  
Conductor: Oxygen Free Copper  
Conductor Material: Copper

### Packing and Shipping:

**Product Packaging:**

The Enameled Flat Copper Wire is carefully packaged to ensure its protection during shipping and handling. Each spool of wire is wrapped in protective materials and placed in a sturdy cardboard box to prevent any damage.

**Shipping:**

Orders for the Enameled Flat Copper Wire are typically shipped via reputable carriers such as UPS or FedEx. The packages are securely sealed and labeled for easy identification. Customers will receive a tracking number to monitor the status of their shipment.

### FAQ:

**Q: What is the brand name of the enameled flat copper wire?**

A: The brand name is PEWSC.

**Q: What is the model number of the enameled flat copper wire?**

A: The model number is Corona-resistance Enamelled copper wires.

**Q: Where is the enameled flat copper wire produced?**

A: The product originates from China.

**Q: What is the certification of the enameled flat copper wire?**

A: The wire is UL certified.

**Q: What is the minimum order quantity for the enameled flat copper wire?**

A: The minimum order quantity is 300KG.
