

Customizable Enamelled Copper Rectangular Wire with Flat Conductor Material in Various Colors

Our Product Introduction

for more products please visit us on enamel-wire.com

Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: HEVW-220C
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

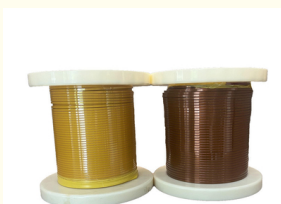

Product Specification

- Conductor: Oxygen Free Copper
- Shape: Flat
- Color: Various Colors Available
- Product Type: HEVW -220C
- Conductor Material: Copper
- Conductor Type: Solid
- Size: Customizable
- Packing: Spool, Coil, Or Customized
- Highlight: **Flat Conductor Enamelled Copper Rectangular Wire**
, Flat Conductor Copper Rectangular Wire

Product Description

Product Description:

Flat Coated Wire, also known as Enameled Flat Copper Wire, is a versatile and high-quality product that is widely used in various industries due to its excellent electrical conductivity and thermal properties. This type of wire is specifically designed with a solid conductor made of copper, offering superior performance and reliability in different applications. The Conductor Type of this Enameled Flat Copper Wire is Solid, ensuring a consistent flow of electricity and minimizing signal loss. The solid conductor construction also enhances the durability and longevity of the wire, making it a cost-effective choice for long-term use. In terms of Shape, this wire is designed in a flat configuration, distinguishing it from traditional round wires. The flat shape provides advantages in certain applications where space is limited or where a specific form factor is required. This unique shape allows for easier installation and routing, making it a preferred choice for many projects. One of the key features of this Enameled Flat Copper Wire is its Customizable Size. Customers have the flexibility to order this wire in various dimensions to suit their specific requirements. Whether you need a small quantity for a prototype or a large volume for mass production, the customizable size option allows for greater versatility in your projects. When it comes to Packing options, this wire is available in Spool, Coil, or Customized packaging. The Spool packaging is convenient for easy storage and transportation, while the Coil packaging offers a more compact solution for smaller quantities. Customized packaging is also available for tailored packaging solutions to meet specific customer needs. The Conductor Material of this wire is high-quality Copper, known for its excellent electrical conductivity and corrosion resistance. Copper is a preferred choice for many electrical applications due to its superior performance characteristics and reliability. The use of copper ensures optimal signal transmission and efficiency in various electrical systems. Overall, the Enameled Flat Copper Wire is a top-quality product that offers exceptional performance and versatility for a wide range of applications. Its solid conductor type, flat shape, customizable size, various packing options, and copper material make it a reliable choice for electrical and electronic projects. Whether you are working on a small DIY project or a large-scale industrial application, this wire provides the durability and efficiency needed to achieve optimal results.

Features:

Product Name: Enameled Flat Copper Wire

Product Type: HEVW -220C

Color: Various Colors Available

Temperature Resistance: 220°C

Conductor Type: Solid

Size: Customizable

Technical Parameters:

Technical Parameter	Specification
Color	Various Colors Available
Shape	Flat
Temperature Resistance	220°C
Packing	Spool, Coil, Or Customized
Product Type	HEVW -220C
Conductor Material	Copper
Size	Customizable
Conductor	Oxygen Free Copper
Conductor Type	Solid

Applications:

Flat Coated Wire, Enamelled Copper Rectangular Wire, and Enamelled Copper Winding Wire are versatile products that find application in a wide range of industries and scenarios. The Enameled Flat Copper Wire by PEWSC, model HEVW-220C, originating from China, is a top-quality product certified by UL.

With a minimum order quantity of 300KG, the price of this wire is dependent on the order size. The packaging details include cartons, ensuring safe delivery to the customers. The delivery time for this product is estimated to be 3-5 work days, and the payment terms are cash on payments.

One of the key attributes of this product is its temperature resistance of 220°C, making it suitable for applications that require high heat tolerance. The product is available in various colors, offering customization options to suit different requirements.

The HEVW-220C wire is a solid conductor type, ensuring efficient transmission of electrical signals. Its size is customizable, providing flexibility to meet specific needs in different projects.

Thanks to its high-quality manufacturing process and adherence to international standards, this Enameled Flat Copper Wire is ideal for use in scenarios such as transformer manufacturing, electric motor winding, inductors, and other electrical applications.

PEWSC's supply ability ensures that orders can be fulfilled promptly, with delivery typically taking place 10-15 days after the next order is placed. This product is designed to meet the demanding requirements of various industries, guaranteeing reliable performance and durability.

Customization:

Product Customization Services for Flat Coated Wire:

Brand Name: PEWSC
Model Number: HEVW-220C
Place of Origin: China
Certification: UL
Minimum Order Quantity: 300KG
Price: It depends on order
Packaging Details: Carton
Delivery Time: 3-5 Work days
Payment Terms: Cash on payments
Supply Ability: Delivery 10-15 Days after Next Order
Color: Various Colors Available
Size: Customizable
Conductor Material: Copper
Shape: Flat
Conductor: Oxygen Free Copper

Support and Services:

Our Product Technical Support team for Enameled Flat Copper Wire is dedicated to providing comprehensive assistance to help you with any queries or issues you may encounter. Our experts are available to offer guidance on product specifications, usage recommendations, troubleshooting, and more.

In addition, we offer a range of services to support our Enameled Flat Copper Wire product, including customization options, technical training, and product maintenance programs. Our goal is to ensure that you have the resources and support needed to maximize the performance and longevity of your copper wire products.

Packing and Shipping:

Product Packaging:

The enameled flat copper wire will be carefully packaged in coils to prevent tangling and damage during transit. Each coil will be wrapped in protective materials to ensure safe delivery.

Shipping:

We offer worldwide shipping for the enameled flat copper wire product. The product will be shipped using a reliable courier service to ensure timely and secure delivery to your location. Tracking information will be provided so you can monitor the status of your shipment.

FAQ:

Q: What is the brand name of the enameled flat copper wire?

A: The brand name is PEWSC.

Q: What is the model number of the enameled flat copper wire?

A: The model number is HEVW-220C.

Q: Where is the enameled flat copper wire manufactured?

A: The product is manufactured in China.

Q: What is the certification of the enameled flat copper wire?

A: The product is certified by UL.

Q: What is the minimum order quantity for the enameled flat copper wire?

A: The minimum order quantity is 300KG.
