

Copper Conductor High Temperature Resistance Enamelled Winding Wire for HEVW -220C Automotive Industry

Our Product Introduction

for more products please visit us on enamel-wire.com

Basic Information

- Place of Origin: China
- Brand Name: PEWSC
- Certification: UL
- Model Number: HEVW-220C
- Minimum Order Quantity: 300KG
- Price: It depends on order
- Packaging Details: Carton
- Delivery Time: 3-5 Work days
- Payment Terms: Cash on payments
- Supply Ability: Delivery 10-15 Days after Next Order

Product Specification

- Temperature Resistance: 220°C
- Conductor Type: Solid
- Packing: Spool, Coil, Or Customized
- Color: Various Colors Available
- Size: Customizable
- Product Type: HEVW -220C
- Conductor Material: Copper
- Shape: Flat
- Highlight: **High Temperature Resistance Enamelled Winding Wire**
, Automotive Industry Enamelled Winding Wire

Product Description

Product Description:

Our Enameled Flat Copper Wire is made from high-grade copper, a superior conductor material known for its excellent electrical conductivity and durability. The flat shape of the wire is ideal for applications where space is limited or a low-profile design is required. Whether you need the wire in a spool, coil, or customized packaging, we have you covered. Our Enameled Flat Copper Wire is available in various packing options to suit your specific needs and preferences.

One of the key features of our Enameled Flat Copper Wire is its customizable size. We understand that different projects require different specifications, which is why we offer the flexibility to customize the size of the wire to meet your exact requirements.

The conductor type of our Enameled Flat Copper Wire is solid, making it ideal for applications where a stable and reliable electrical connection is essential. The solid conductor ensures consistent performance and minimizes the risk of signal interference or loss.

When it comes to quality and performance, our Enameled Flat Copper Wire is second to none. Whether you need flat coated wire, enamelled copper rectangular wire, or flat coated wire, our product delivers exceptional results every time.

Trust our Enameled Flat Copper Wire for your electrical projects and experience the difference that superior quality and reliability can make. With its high-grade copper conductor, flat shape, customizable size, and solid conductor type, our wire is the perfect choice for a wide range of applications.

Invest in our Enameled Flat Copper Wire today and take your projects to the next level with a product that is designed to exceed your expectations.

Features:

Product Name: Enameled Flat Copper Wire

Product Type: HEVW -220C

Packing: Spool, Coil, Or Customized

Shape: Flat

Color: Various Colors Available

Conductor Type: Solid

Technical Parameters:

Conductor Material	Copper
Size	Customizable
Shape	Flat
Conductor	Oxygen Free Copper
Conductor Type	Solid
Temperature Resistance	220°C
Product Type	HEVW -220C
Color	Various Colors Available
Packing	Spool, Coil, Or Customized

Applications:

Product Application Occasions and Scenarios for Enameled Flat Copper Wire:

The Enameled Flat Copper Wire, also known as Flat Coated Wire or Enamelled Copper Rectangular Wire, offered by PEWSC under model number HEVW-220C is a versatile product suitable for various applications across different industries. With its unique attributes and specifications, this product is ideal for the following scenarios:

Electrical Motors: The Enameled Flat Copper Wire is commonly used in the winding of electrical motors due to its excellent conductivity and temperature resistance up to 220°C. Its solid copper conductor material ensures efficient performance in motor applications.

Transformers: This product is well-suited for transformer winding applications where a flat and coated wire is required. The flat shape of the wire allows for compact winding, making it a preferred choice for transformer manufacturers.

Coil Manufacturing: The Enameled Flat Copper Wire is widely used in the production of coils for various electronic devices and equipment. Its shape and solid conductor type make it easy to wind and assemble in different coil configurations.

Electrical Appliances: Manufacturers of electrical appliances such as refrigerators, air conditioners, and washing machines utilize this product in the production of coils and windings for efficient operation and performance.

With its UL certification and origin from China, customers can trust the quality and reliability of the Enameled Flat Copper Wire from PEWSC. The minimum order quantity of 300KG allows for bulk purchases, and the pricing is dependent on the order quantity. Packaging details include cartons, and delivery time is estimated at 3-5 working days.

Payment terms for this product are cash on payments, and the supply ability ensures delivery within 10-15 days after the next order.

Whether it's for electrical motors, transformers, coil manufacturing, or electrical appliances, the Enameled Flat Copper Wire from PEWSC is a top choice for various application occasions and scenarios.

Customization:

Product Customization Services for Enameled Flat Copper Wire:

Brand Name: PEWSC

Model Number: HEVW-220C

Place of Origin: China

Certification: UL

Minimum Order Quantity: 300KG

Price: It depends on order

Packaging Details: Carton

Delivery Time: 3-5 Work days

Payment Terms: Cash on payments

Supply Ability: Delivery 10-15 Days after Next Order

Conductor Type: Solid

Conductor Material: Copper

Packing: Spool, Coil, Or Customized

Product Type: HEVW -220C

Color: Various Colors Available

Keywords: Flat Coated Wire, Enamelled Copper Winding Wire, Enamelled Copper Rectangular Wire

Support and Services:

Our Product Technical Support and Services for Enameled Flat Copper Wire include:

- Expert guidance on product specifications and applications
- Troubleshooting assistance for any technical issues
- Product customization options to meet specific requirements
- Training and resources to help customers maximize the performance of the wire
- Regular updates on industry trends and advancements in copper wire technology

Packing and Shipping:

Product Packaging:

The Enameled Flat Copper Wire is carefully packaged in a sturdy cardboard box to ensure its safety during transportation. Each spool is securely wrapped to prevent any damage or tangling during shipping.

Shipping:

We ship the Enameled Flat Copper Wire using reliable courier services to ensure timely delivery. The product is shipped in boxes that are clearly labeled for easy identification. Customers will receive a tracking number to monitor the status of their shipment.

FAQ:

Q: What is the brand name of the enameled flat copper wire?

A: The brand name is PEWSC.

Q: What is the model number of the enameled flat copper wire?

A: The model number is HEVW-220C.

Q: Where is the enameled flat copper wire produced?

A: The product is manufactured in China.

Q: What is the certification for the enameled flat copper wire?

A: The product is certified by UL.

Q: What is the minimum order quantity for the enameled flat copper wire?

A: The minimum order quantity is 300KG.
